It has been short-listed in WSA-mobile 2014 as best mContent from Egypt, and has been honored with a 2016 Academics' Choice *Smart Media* Award, a prestigious seal of educational quality, reserved only for the best mind-building media. Kotobee Cloud is a miniature version of Kotobee Library, allowing control on user access for a single ebook instead of a collection of ebooks. Ebook apps exported through Kotobee Author may optionally be converted into a cloud ebook, which are always connected to the Kotobee Cloud server. At anytime, cloud ebooks can be made public, opening access to everyone, or private, allowing access only to certain users. Privileged users may access the ebook either using their email / password combination or using a promo code provided by the administrator.

Cloud ebooks exported to different devices and platforms provide the advantage of having the student's annotations (notes, bookmarks, and highlights) easily retrievable from any device. Cloud ebooks are a great way for remote learning if the number of ebooks is not many.
